When UX doesn't consider ALL users, shouldn't it be known
as "SOME User Experience" or... SUX? #a11y

♥ 511 9:05 AM - Jan 6, 2015

How to Avoid SUX

or “Some” User Experience

Web Accessibility

≠

designing and developing for a
visually/hearing/etc impaired
person

Web Accessibility

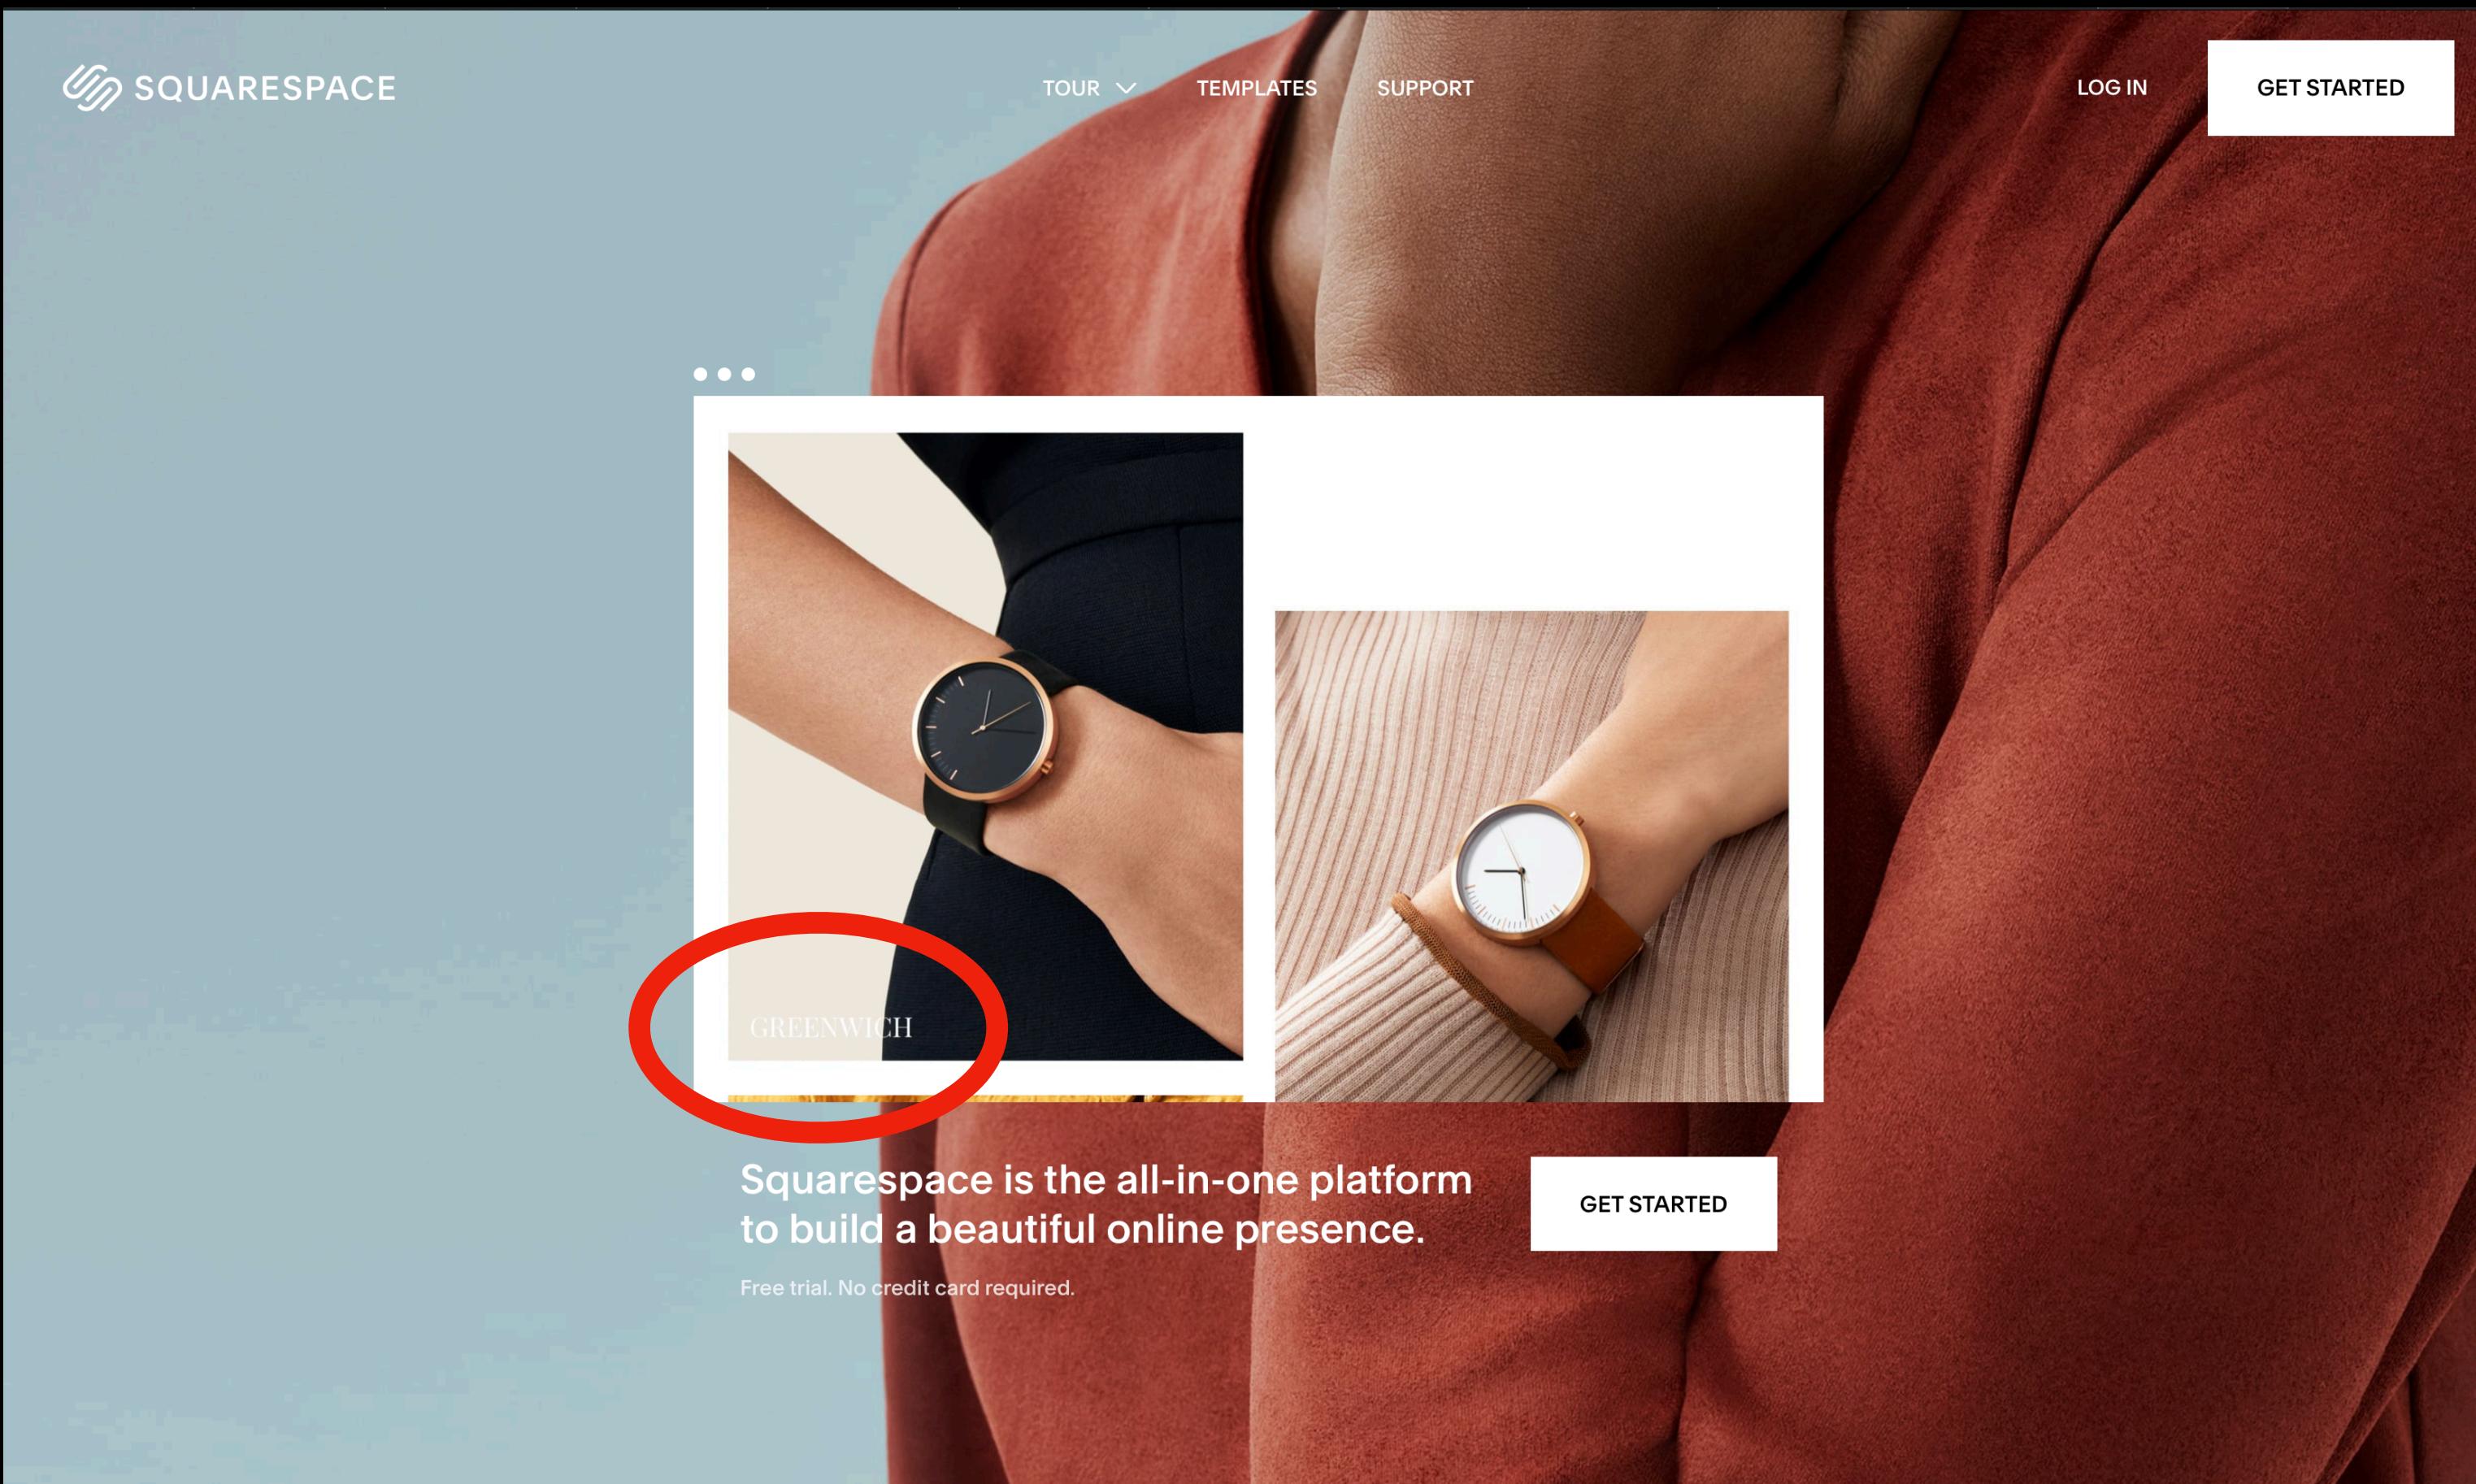

=

designing and developing for **EVERY**
person

Web Content Accessibility Guidelines 2.0

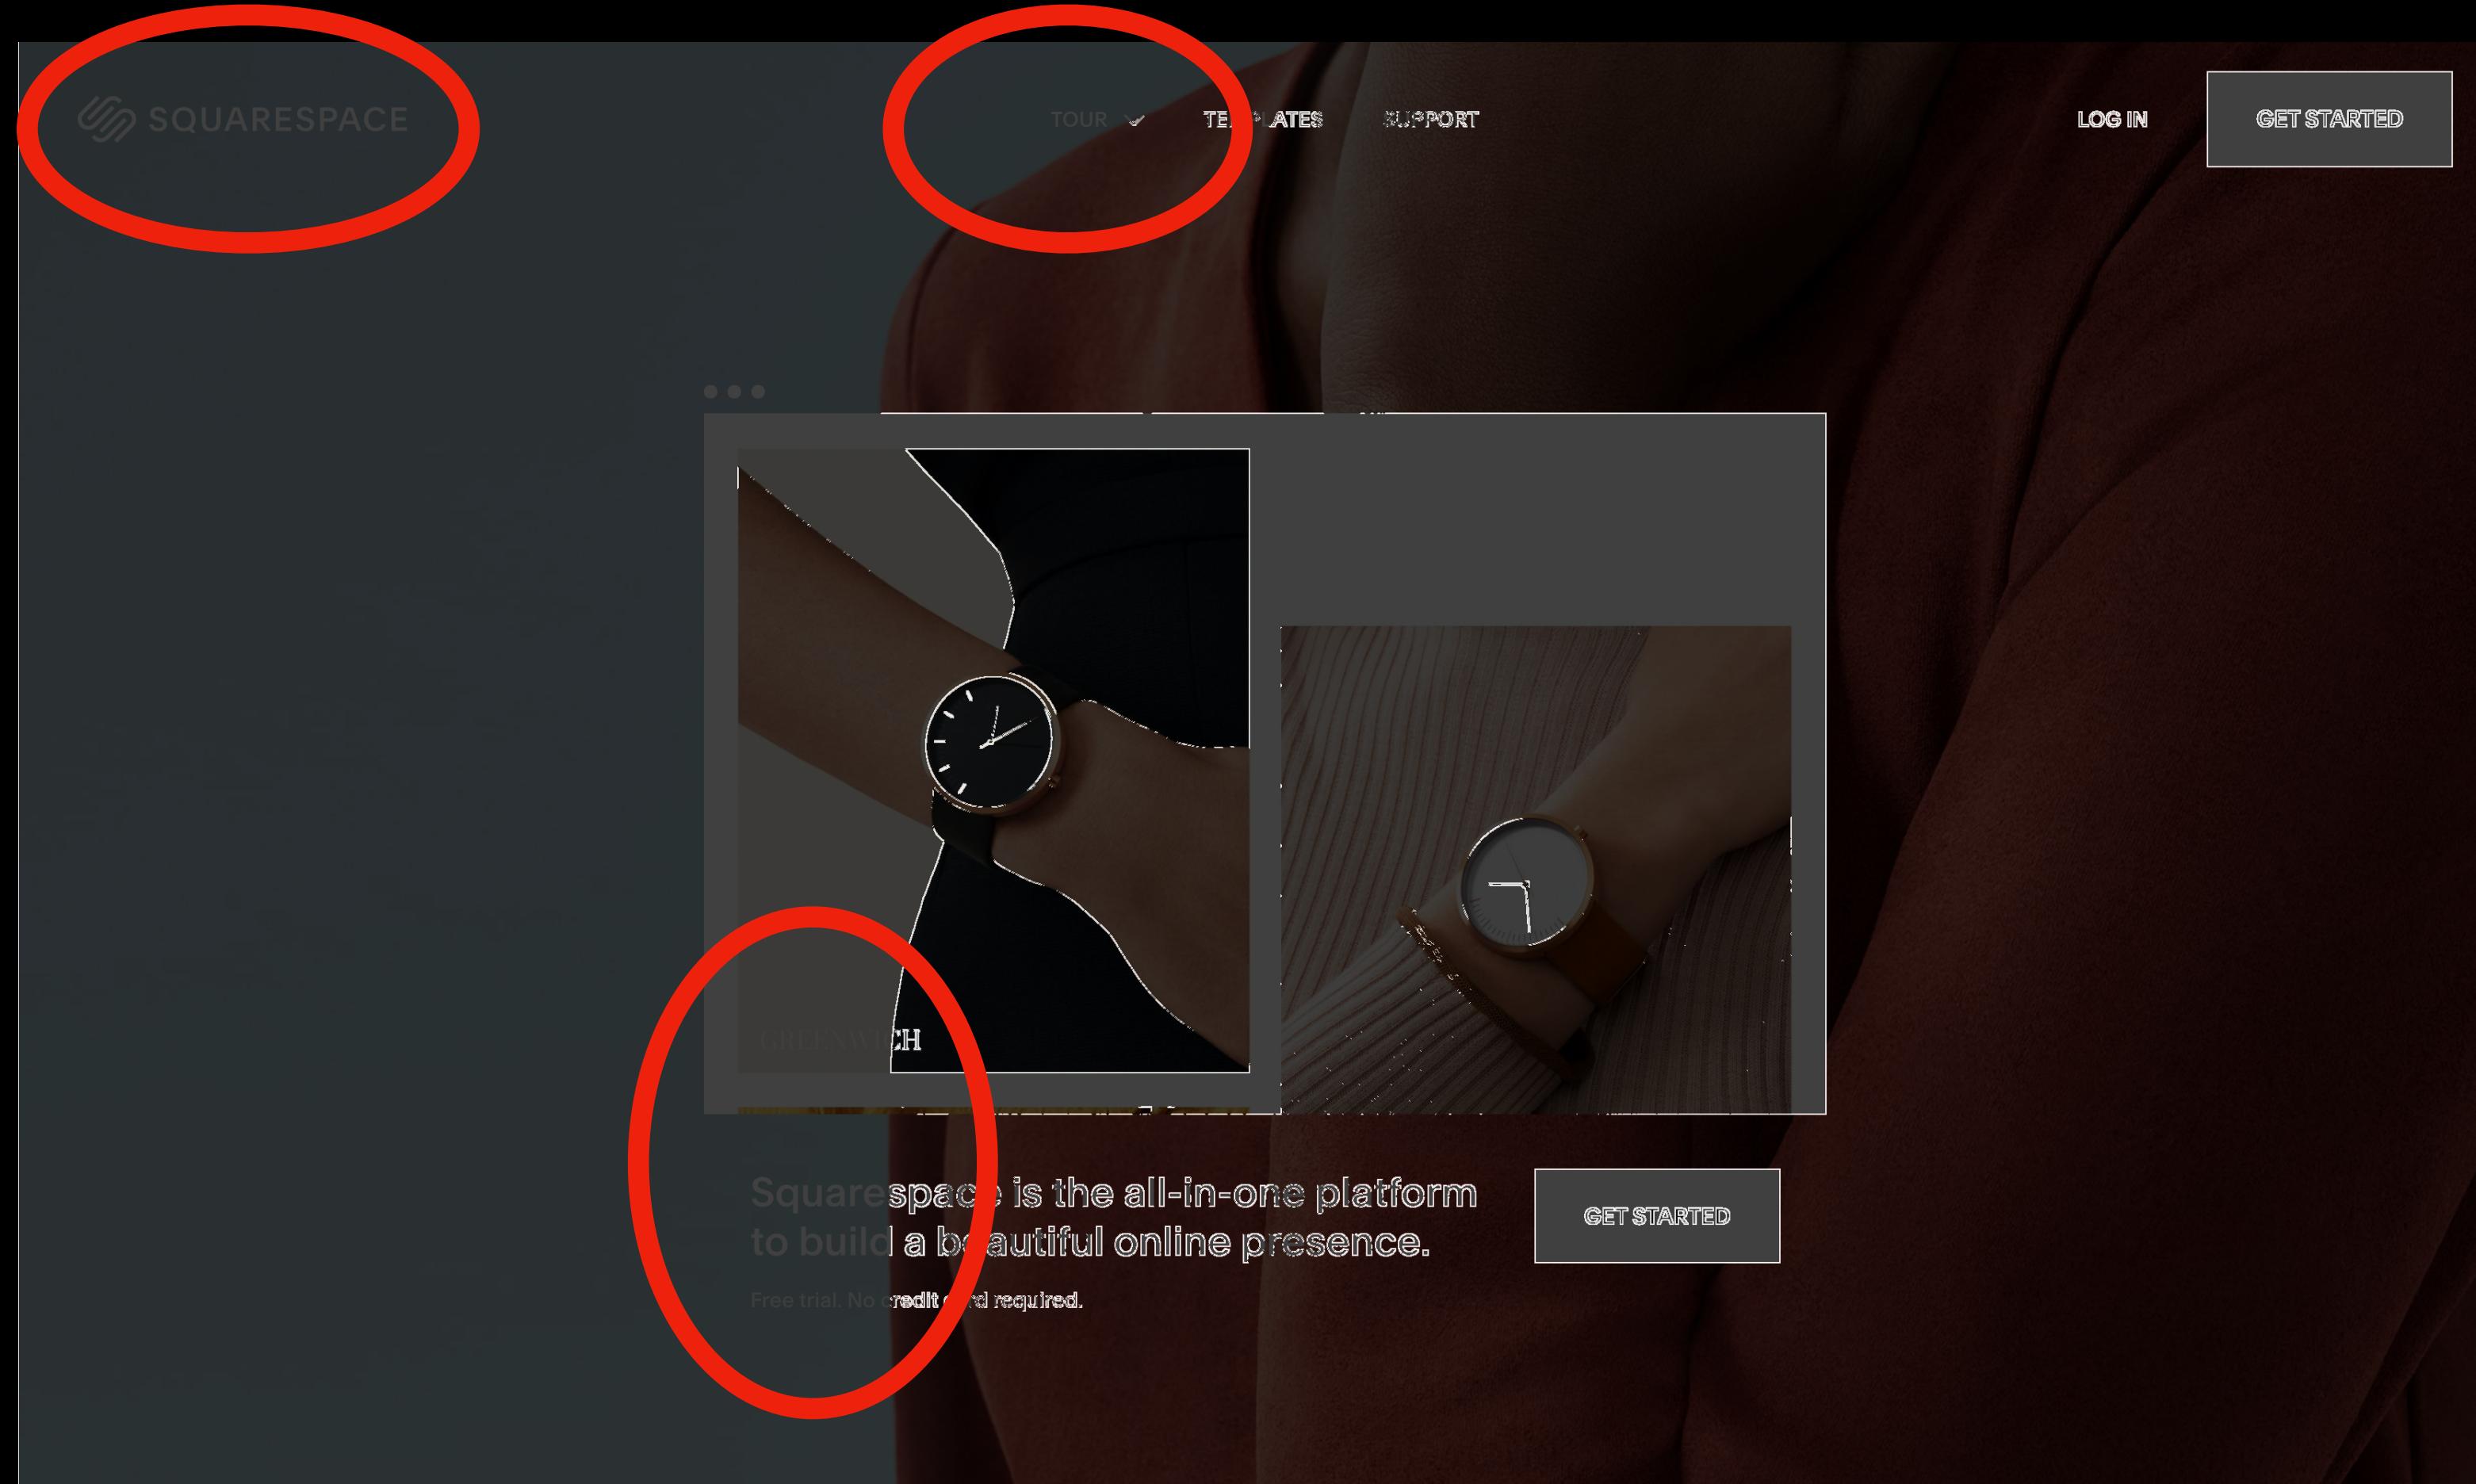

WCAG

BINGING WITH BABISH

home recipes book about podcast contact basics [D](#) [f](#) [t](#) [g](#) [p](#)

PATREON

The support from my audience not only makes the show possible, it begets the creation of new series like *Basics with Babish*. I want to be part of the new wave of media creators, and your contributions are helping make that a reality.

Contrast is the difference in luminance or color that makes an object (or its representation in an image or display) distinguishable. In visual perception of the real world, contrast is determined by the difference in the color and brightness of the object and other objects within the same field of view.

Other things

- WAI-ARIA
- Non-text content
- Alternative to video/audio only content
- Captions in videos
- Color shouldn't be an essential identifier
- Sensory characteristics
- Timing adjustable
- Keyboard traps
- Pause, stop, hide
- Three flashes or less
- Skip to Main Content
- Clear page titles
- Language of page
- Elements shouldn't change when they receive focus
- Elements shouldn't change on input
- Clearly identify errors
- Clear instructions
- No code errors
- Name, role, value
- Text can be resized to 200% without loss of content or function
- Don't use images of text
- Headings
- Accessibly and usable CAPTCHA
- Offer multiple ways to get to pages
- Suggest fixes for errors
- Consistent navigation
- Reduce risk of input errors
- Show example of format for input (if specific format required)
- Abbreviations
- Reading Level
- Explain hard-to-pronounce words
- Explain unusual words
- Sitemaps
- Breadcrumbs
- DON'T INTERRUPT USERS
- Avoiding Lawsuits
- Case studies
- Accessibility vs Usability
- WCAG 2.0 A vs AA vs AAA compliance
- Save user data if the user needs to re-authenticate
- Offer a variety of presentation options
- No background audio
- NO AUTOMATICALLY PLAYING VIDEOS
- Consistently identifiable buttons and icons
- Consistent behavior in like elements
